A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,620,236 to McGrath et al.

Re-claims 1, 2 and 11, McGrath et al. discloses a trailer brake controller, comprising: a control element 250 is positioned in a passenger vehicle; a vehicle speed input from the ABS is provided to the control element, column 19 lines 30-37; a vehicle brake pressure input is provided to the control element, column 12 lines 15-18; a trailer brake output, see abstract, the trailer brake output is controlled by the control element in response to the vehicle speed input and the vehicle brake pressure input.

Art Unit: 3683

Re-claim 3, McGrath et al. incorporates by reference a means for sensing brake pressure that is attached to the master cylinder, see column 12 lines 16-17.

Re-claims 4, 5, 12 and 13, indicator lamps 33 indicate operation of the trailer brake and are interpreted as diagnostic inputs in communication with the control element.

Re-claims 6 and 14, an ABS activation input is in communication with the control element, column 19 lines 17-46.

Re-claims 7-9, 15-17, lamps 33 act as a display and are interpreted as communication elements that provide communication to the vehicle occupant.

Re-claims 10, 18 and 19, the display includes gain input control, gain display and signal strength, column 4 lines 60-67.

Re-claim 20, McGrath et al. discloses a method of controlling a trailer brake system comprising: determining a vehicle speed and vehicle brake pressure through communication with an anti-lock braking system, relaying the speed and pressure information to a control element 250; using the speed and pressure information to determine a trailer brake pressure output signal; sending the brake pressure output signal to the trailer braking system.

Re-claim 21, a diagnostic or operational signal is sent to the trailer braking system, lamps 33 provide indication to the vehicle occupant of the diagnostic signal.

Re-claim 22, a display is mounted within the vehicle dash, column 3 lines 29-35.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Becker et al. teaches a brake pressure sensor attached to the master cylinder, Becker
